Z40 ADVANCE Service Cabinet

zummo

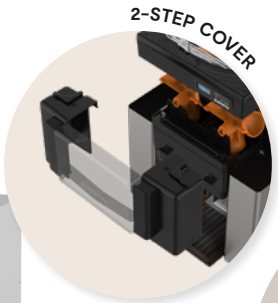

Maximum yield for continuous service

Zummo steps up a level with its Z40 juicer, creating the Z40 Advance Service Cabinet version. With this concept, it covers the specific needs of supermarkets and megastores. Its fast juice extraction speed, its wide variety of squeezable fruit and its cabinet with Easy Fill make this model the perfect option to attend the large juice demands of this type of establishment.

2 gal tank available and a larger waste basket for higher production.

Featuring a new design, the innovative Quick Exchange System (QES system), and unmatched production capacity, the Z40 Advance Service Cabinet is here to remain the benchmark in its category.

Retail

Ref: CS40-D80

Modular units designed to cover the natural juice demand in megastores. The Zummo Retail range includes juicers, cabinets, dispensers and specialised accessories that can be combined to offer the most adequate solution for every space.

Profitability in juice extraction, intuitive use and simple maintenance. These are the key points that make Zummo Retail the best option to make your business grow.

EVS® Advanced

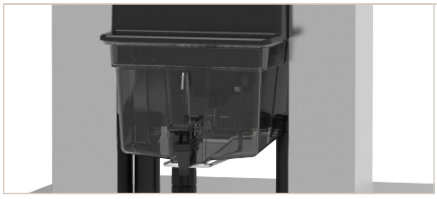

Unique vertical juice extraction system; a Zummo exclusive. Based on manual juice extraction system it achieves maximum profitability, obtaining the purest possible juice with the greatest operational functionality.

Juice extraction kits with Boost Up.

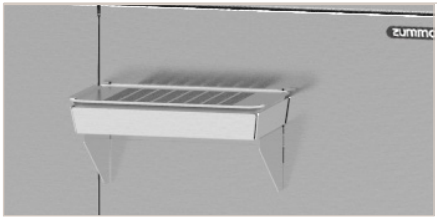

The different-sized juice extraction kits help to maximise the yield of the juice extracted from the fruit depending on its diameter: Medium (**M**): Orange; Large (**L**): Maroon.

Up to **3%** more performance with the Boost Up™ kit compared to the previous kit.

Service Tank

It is a 2 gal capacity tank that collects the squeezed juice and features a spout for dispensing it as needed.
It is particularly well-suited for handling large spikes in demand at specific times. On models with a Service tank, the spout does not activate the machine; instead, the juicing system is activated via the control panel.

Service Cabinet

Cabinet designed for the Service function, featuring a drip tray mounted directly on the cabinet's front door. This drip tray is height-adjustable to three positions, depending on the customer's needs. The filling heights are 8", 9", and 11".

In its Plus version, it includes two bins with a waste capacity of 14.5 gal each.

Easy Set up feeder

The Easy Set Up Feeder allows assembly and disassembly in 3 steps, juicing 92% of oranges (M-L kit) without clogging.
